CREAR UN REPOSITORIO EN GITHUB

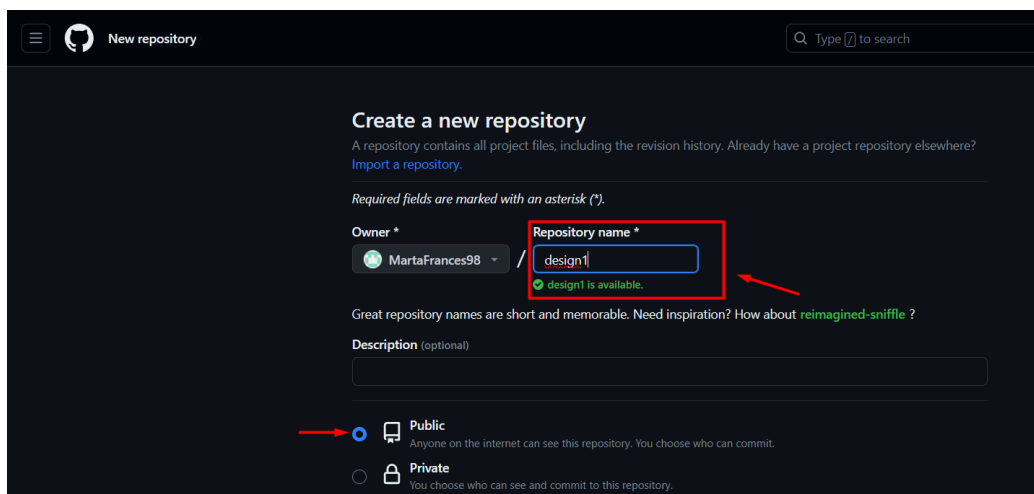

I created a new repository in github with an other name because when i created de first repository i did not take screenshots of the process.

Screenshot1:

Lo primero de todo es crear un nuevo repositorio, para ello damos al botón verde de “New”.

Screenshot1:

Nos dirigirá para crear el repositorio, en “Repository name” ponemos el nombre que queramos, en nuestro caso pondremos “desing1”. Luego marcaremos la opción “Public”.

INTERZACES DESIGN

Screenshot1:

☒ **Public**
Anyone on the internet can see this repository. You choose who can commit.

☐ **Private**
You choose who can see and commit to this repository.

Initialize this repository with:

☐ **Add a README file**
This is where you can write a long description for your project. [Learn more about READMEs.](#)

Add .gitignore
.gitignore template: **None** ▾
Choose which files not to track from a list of templates. [Learn more about ignoring files.](#)

Choose a license
License: **None** ▾
A license tells others what they can and can't do with your code. [Learn more about licenses.](#)

📘 You are creating a public repository in your personal account.

Create repository

Una vez hecho lo anterior hacemos click en “Create repository”.

Set up GitHub Copilot
Use GitHub's AI pair programmer to autocomplete suggestions as you code.
[Get started with GitHub Copilot](#)

Add collaborators to this repository
Search for people using their GitHub username or email address.
[Invite collaborators](#)

Quick setup — if you've done this kind of thing before
[Set up in Desktop](#) or [HTTPS](#) [SSH](#) <https://github.com/MartaFrances98/design1.git>
Get started by **creating a new file** or uploading an existing file. We recommend every repository include a README, LICENSE, and .gitignore.

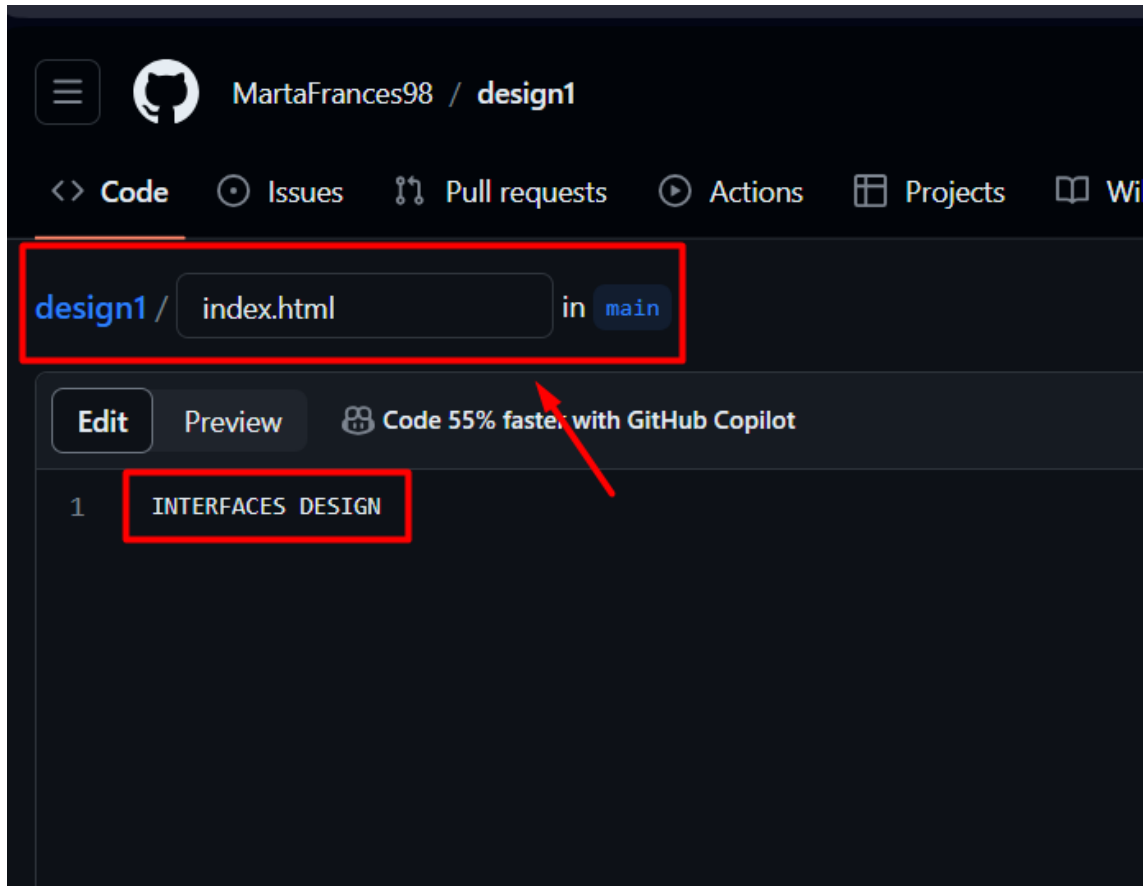

...or create a new repository on the command line

```
echo "# design1" >> README.md
git init
git add README.md
git commit -m "first commit"
git branch -M main
git remote add origin https://github.com/MartaFrances98/design1.git
```

Cuando creamos el repositorio debemos crear un archivo nuevo, daremos click a “Creating a new file”.

INTERZACES DESIGN

Screenshot1:

Le daremos el nombre de “index.html” y lo rellenamos.

Screenshot1:

Damos click a “Commit changes...” para guardar el archivo.

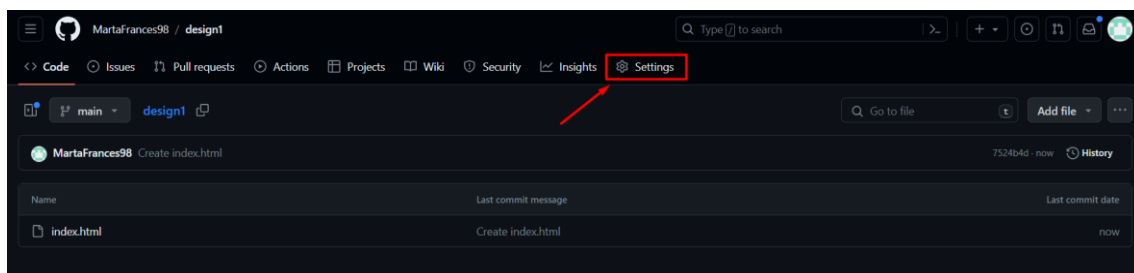

INTERZACES DESIGN

Screenshot1:

Nos pedirá un mensaje para el commit y daremos a “Commit changes” para guardar el archivo.

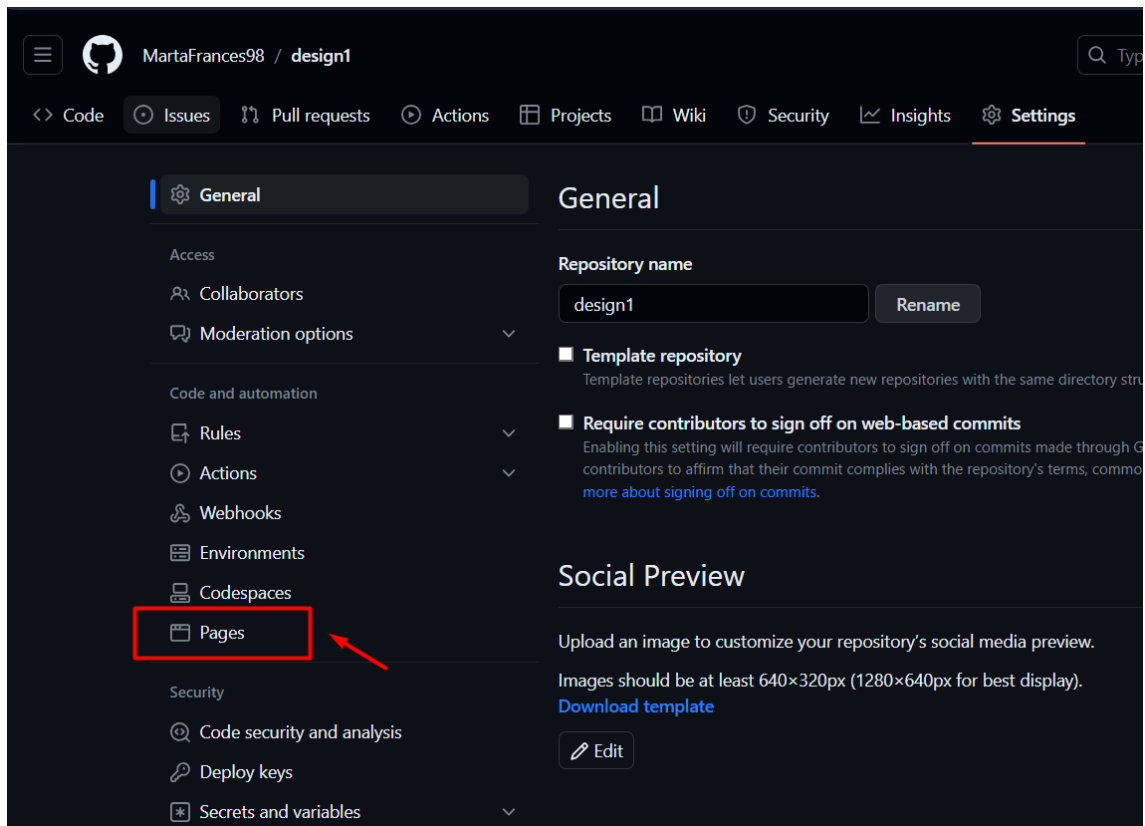

Screenshot1:

Una vez creado el archivo nos dirigimos a la pestaña de “Settings”.

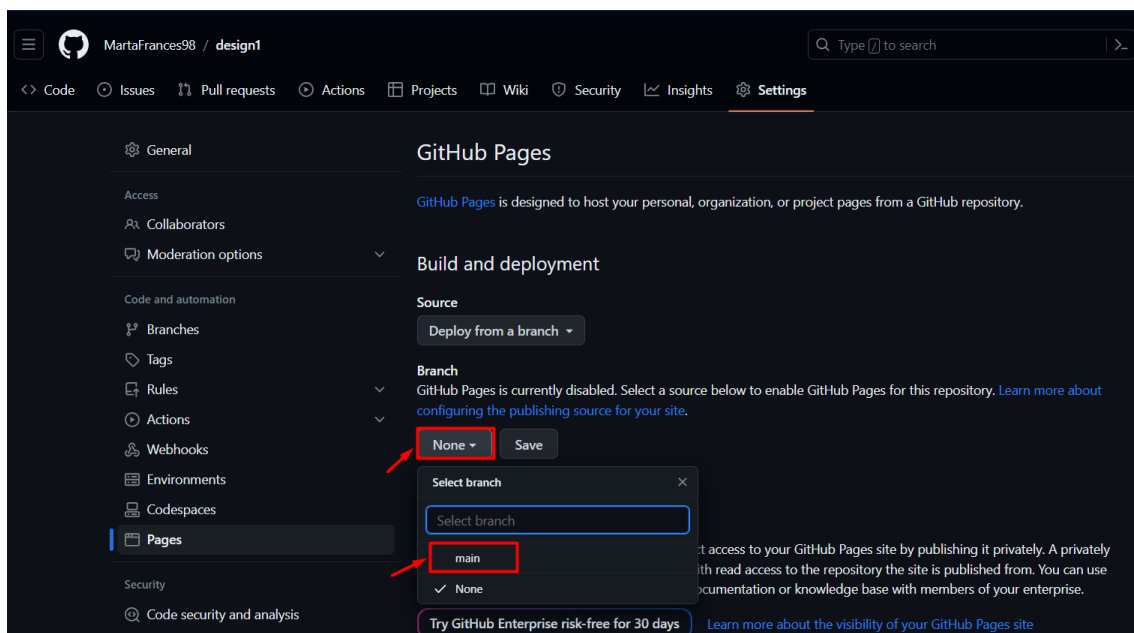

INTERZACES DESIGN

Screenshot1:

Después nos dirigimos al apartado de “Pages”.

Screenshot1:

Nos dirigimos “Build and deployment/Branch” en “None” seleccionamos “main”.

INTERZACES DESIGN

Screenshot1:

Una vez seleccionado “main/root” damos a “Save”.

Screenshot1:

En “Custom domain” le daremos el nombre que queramos poner al dominio y luego damos a “Save”.

Screenshot1:

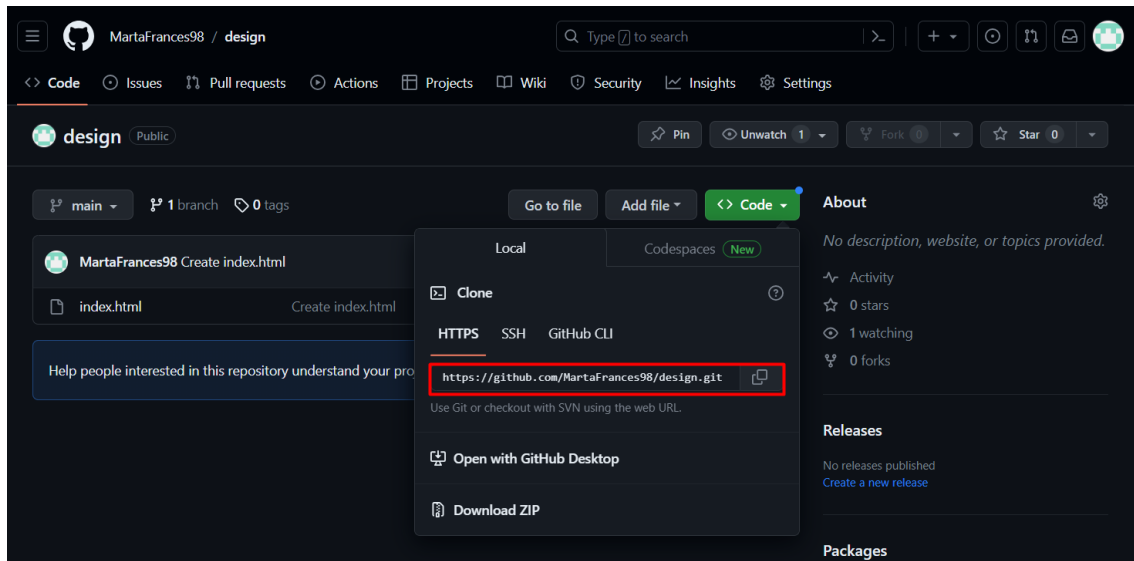

Una vez hecho lo anterior en el apartado “General” nos aparecerá la web de nuestro repositorio.
